

INTRODUCTION

It's Not The Failure, It's The Fix

I am pleased to introduce you to Atlantic Switch & Generator.

With over 80 years of combined industry experience, competence in both generators *and* switches, plus a sincere desire to service every customer like no other provider, ASG is well-positioned to service your critical electrical equipment.

You and I are both well aware that electrical equipment eventually fails. What separates providers is the fix. With factory-trained, degreed emergency power specialists, the quality of the fix is the reason more and more are switching to ASG.

Service? We live and breathe it. ASG takes great pride in making customers' lives easy...no billing issues, fulfilling promises, a real person to take your call...all the types of characteristics you've wished providers had. We have them.

The Switch Is On

Regardless of your current situation - certification or compliance issues, under contract, training needs, preventative maintenance - let me demonstrate why the switch is on to ASG.

I'd welcome the opportunity to provide a free evaluation or, perhaps, a custom quote.

Give me a call...ASG will be there with *The Fix*.

Sincerely,

Dave Poythress
Director of Sales
Atlantic Switch & Generator
